SPAT2695

Basic Picture Math 2

PCI Education

2004 CD Rom

SPAT2771

Level 1 of 3, teaches and reinforces the most basic math skills. Levels 2 and 3 introduce more challenging concepts. Each level is divided into units that cover skills taught in the print program. Every unit begins with a clear explanation of the concept. Students then complete a variety of interactive problems to practice and master the skill covered in that unit. Because the skills taught are so basic, the units are best used sequentially.

Recognize & Count Numbers 1-20, Use Addition Operations with Facts to 10, Use Subtraction with facts from 10, Identify characteristics & properties of two & Three dimensional geometric shapes. Recognize equivalent representations for the same number, Create & use representations to organize, record & communicate mathematical ideas.

How Do You Know It? How Can You Show It?

Reed, P., Bowser, G., Korsten, J.

Wisconsin Assistive Technology Initiative
2002 Assistive Tech

SPAT2414

The purpose of this manual is to guide teams in developing strategies to evaluate the effectiveness of assistive technology. Rather than providing 'the' way to measure, How Do You Know It? How Can You Show It? presents a 'thought' process to support the development of data collection appropriate for a variety of assistive technology applications. It is intended to help service providers develop a plan for gathering 'data' in specific situations. 103pp. plus blank forms.

iPad Assistive Technology Package

SPAT7862

Package includes:

- Apple iPad with Wi-Fi
- The Otter Box Defender Case
- The Switch Easy Thumb Tack Microphone
- The Mobile Alu Pen for iPad, iTouch, etc.
- The iPad Speaker from RJ Cooper

The iPad with iPad Cordless Super-Switch and the iPad Cordless Switch Interface from RJ Cooper!

iPad Cordless Super-Switch

This one switch does it all! It's 5" diameter makes a great target for those that need it. And it's built-in switch interface can work with *any* switch(es) for "Auto" or "Step" scanning.

iPad Cordless Switch Interface

That's right. Switch access to I pads! Plug any switch(es) into it for cause/effect, switch timing practice, AAC auto-scan and step-scan, spelling, and any other apps on the horizon!

It works through Bluetooth 2.1 for simple pairing and range of over 50 ft. Any app that has been programmed for switch access can use my iPad Super Switch. And all AAC app developers *are* incorporating switch access, eventually, and will work with my devices.

It has a lithium-ion battery that recharges through your USB port or USB AC charger.

SPAT2731

Electronic device-batteries included.

This is a communication device that provides 16 minutes and 8 levels of communication to meet each student's developing communication needs. Use the SuperTalker (TM) progressive communicator to move students through 1, 2, then 8 messages or use the Progressive Communication Framework to provide multiple communication opportunities within the same activity.

SPLISE Assistive Technology

Switch Interface Pro 6.0

Don Johnston Inc.

2010 Assistive Tech

SPAT7705

The Switch Interface Pro 6.0 allows specially designed switch activated software to use customized settings in place of keyboard commands.

Now supports Clicker 5!

Don Johnston's NEW Switch Interface Pro 6.0 is the industry's easiest-to-use interface because it requires no software and can be used with both Windows and Macintosh computers. Five ports allow you to plug in multiple switches and provide the flexibility of emulating everything from a single-click to a return.

Consequently, your students gain access to the widest variety of switch-accessible software available and now the new version now supports Clicker 5!

Just push a button to change function sets. Connect up to five standard switches to run your switch-enabled software. All the information you need to operate the switch interface is printed right on it.

Teachers get programs up and running in seconds. Bright indicator lights tell teachers which functions are active. Connects to USB ports and the extra-small size makes it easy to tuck away and travel with. Each interface comes with the cables needed for connecting to the computer.

Switch Latch and Timer

Able Net Inc.

Assistive Tech

SPAT1733

The Able Net Switch Latch and Timer (SLAT) allows switch operation of battery-operated toys and appliances. This model enables you to connect one switch and operate one toy or appliance in one of the three modes of control.

Talking Symbols notepad

AbleNet, Inc.
2003 Assistive Tech

SPAT2536

The affordable Talking Symbols notepad was developed to help teachers engineer classroom environments that promote learning in every corner. Record a 10 second message, add a matching symbol and mount it on any surface using Velcro or the notepad's internal magnet. Now you're ready to make language "visible" with motivational messages, assignment, instructions, reminders and more. (communication)

TASH Microlite Switch

Able Net Inc.
Assistive Tech

SPAT1742

The switch is a light touch switch that can be used to access electrical devices through an environmental control unit, battery devices through a battery device adapter, a voice output communication aid through a switch jack, a computer and its software through a computer switch interface, or any other type of switch-accessible product. (**Access**)

Tech II, 8 C.3

Advanced Multimedia Devices, Inc.
Assistive Tech

SPAT2387

Tech II, 8, A device with strap, instruction sheet, disk (overlay templates), worksheet. The Tech II 8 is an eight message augmentative communicator offered with either 6, 8 or 12 levels, for a total of up to 96 messages. The standard message length is 4.5 second per message or you can order it with extended time and have 9 seconds per message. The membrane has the same light touch technology and is water resistant. In addition to the internal speaker and record button, there are external jacks for speaker and record switch. The recording time is time locked by a microprocessor.
